**Information for authors.** The journal publishes significant new research in financial economics, striving to establish a balance between theoretical and empirical studies. The principal criteria for inclusion is a paper's quality and contribution to the field of finance, without undue regard to its technical difficulties. Manuscripts are accepted for publication on the understanding that they have been submitted solely to *The Review of Financial Studies* and that they have not been previously published either in whole or in part.

**Manuscript preparation.** Manuscripts should be typewritten using double-spacing throughout, including tables and references. Assemble sections in the following order: title page, abstract, text, references, tables, and legends for figures. The original and two copies should be sent to the executive editor, Michael J. Brennan, Graduate School of Management, University of California, Los Angeles, CA 90024. Manuscripts should be accompanied by a submission fee of $75 for members of the Society for Financial Studies or $125 for non-members.

The *Title page* should include the title, name, address, and telephone number of the author responsible for correspondence as well as the name and address of the author to whom requests for reprints should be sent.

Each article should include an *Abstract* of not more than 100 words, beginning on a separate page. The *Text* should also begin on a separate page. References should be cited in the text by author's last name and the year of publication. *Footnotes* should be kept to a minimum. Do not number author affiliations or acknowledgements of support or assistance. *Equations* should be numbered consecutively with arabic numerals.

*Tables* should be typewritten, each on a separate page, and numbered sequentially with arabic numerals; each should have a brief, descriptive title. Vertical and horizontal rules should not be used. They should be as self-explanatory as possible, incorporating any necessary descriptive material in an unnumbered footnote.

*Figures* should also be numbered consecutively with arabic numerals. All explanatory material should be included in the legend and not in the figure itself. Submit review copies of each figure with the manuscript. Upon acceptance, final figures should be submitted in camera-ready form, preferably as glossy photographic prints. All artwork and typography should be of professional quality. Typewritten figures are not acceptable. Each figure should have a stick-on label on the reverse with the figure number and the author and title of the article. Figure *Legends* should be typed together on a separate sheet.

*References* should be typed entirely double-spaced and begin on a separate page. They should be in alphabetical order, unnumbered, and follow the samples below.

**Christopher M. James**
*University of Florida, Gainesville*

**Anjan V. Thakor**
*Indiana University, Bloomington*

Burgeoning interest among academics in the design of financial contracts and institutions has been spurred by developments in information economics and option pricing. The **Journal of Financial Intermediation** will collect and stimulate research in this area, stressing the use of contemporary analytical and empirical tools.

Research Areas Include

- Theory of financial intermediation, especially the evolution and role of financial institutions
- Informational bases for the design of financial contracts
- The role of insurance firms in influencing allocations and the efficiency of market equilibrium
- Choices among financing sources
- The role of investment bankers in the development of new financial contracts and methods of raising capital
- Lending and funding behavior of depository financial institutions under informational asymmetry and uncertainty
- Economics of financial engineering
- Interactions between real and financial decisions
- Public regulation of financial markets and institutions in the context of market globalization

*Published under the Auspices of the Banking and Insurance Research Centers at Kellogg Graduate School of Management*

Volume 1 (1990), 4 issues
